

**AMENDMENTS TO THE SPECIFICATION**

On page 13, please replace the paragraph beginning on line 19 with the following:

*A1* --The tool 300 depicted also includes a handle portion ~~840~~ 340. The handle portion includes means for slidingly moving the shaft 315 within the housing 305 and for rotating the shaft 315. In the embodiment shown, the means includes a thumbwheel 341. In some embodiments, the handle portion 340 has a Hudson end attachment 342.--

On page 14, please replace the paragraph beginning on line 5 with the following:

*A2* --Referring now to Figure 14, in one embodiment, the occlusion member ~~820~~ 320 includes a plate ~~821~~ 321 which defines a groove ~~822~~ 322. A fastener ~~830~~ 330 is engaged to a fastener bore ~~809~~ 309 in the housing ~~805~~ 305 and the groove ~~822~~ 322 is disposed around the fastener ~~830~~ 330. In this way, the plate ~~821~~ 321 is slideable relative to the housing ~~805~~ 305.--
